Think Aloud Script/Data Collection

Participant Name: _____

Researcher Script
"We are currently working on a health application and would like to see how you interact with the current features. We ask that you say all your actions out loud and the thought process behind your actions. For practice we will have you perform simple calculator operations and have you say everything you are thinking including why you chose what button."

Practice Tasks
"Calculate 57.3 times 1900"
"Calculate 40% of 360"
"Type 'hello'"
"Calculate 0.4 divided by 52"

NOTE: If user is not actively describing their actions encourage speech with "don't forget to describe what you're doing" or "remember to think out loud."

Task: *Sign in using existing user*	**Prompts Used for this Task:** Yes ___ No ___
